The Tunnel Opens in Six Months

50–60 minutes / Work independently

You advise Marel, a lunar settlement negotiating access to a freight tunnel. Test who can stop a train under each agreement and decide what a new warning changes.

Open the activity in a browser. The sources and tools you need are inside.

1. Make an opening recommendation

Read the freight agreement and identify one benefit or risk that matters to Marel.

2. Run both gate trials

Predict the outcome and watch the approval sequence. Record the first action that differs between the two trials.

3. Handle the alert and write the cabinet report

Make a recommendation using the first record, then compare it with the later record. Apply the same logic to the ferry and its relay tower.

Minimum words in For Class

Opening reason	**15**	Alert memo	**45**
Alert reason	**20**	Ferry memo	**30**
Tunnel memo	**35**		

Start, pause, and submit

Choose For Class at the start. Enter your name and, if you wish, your class or section. Finish the responses and checks to open your report.

To pause or change devices, open Save & resume and download a JSON backup. Use the same activity and mode to restore it.

Choose Download Class PDF in your finished report. If needed, use Print or save as PDF. Open the PDF to check your name and responses, then upload it to Canvas.
